

Rothiemurchus

Countryside Activities & Tours Manager

New Management Position

At Rothiemurchus in the Cairngorms National Park we care for the unique natural and cultural environment by welcoming and enabling people to enjoy a range of well managed, appropriate commercial outdoor activities. In this way everyone can enjoy the special nature of Rothiemurchus and help care for it for future generations.

The new position is created because of a re-organisation. In the past we have operated the clay target shoot, the fishery and the ranger service as separate businesses; we are now reorganising them with teams for bookings, maintenance and instructors/rangers.

The Bookings and Maintenance Managers are already in place and the team will be completed by the appointment of the Countryside Activities & Tours Manager.

The successful applicant must have proven leadership experience, NGB instructor qualification or equivalent, excellent communication and diplomacy skills, good admin and IT and have a positive problem solving attitude. Skill and experience in activity instruction or as a countryside ranger is important. The purpose is to ensure that those with these skills can keep up to date, learn from each other, work efficiently together and as part of the wider team and so deliver an excellent and profitable customer experience.

Applications should be emailed to: Johnnie Grant of Rothiemurchus
